In an increasingly connected world, staying online while traveling has become essential. This past spring, we had severe issues with connectivity throughout France. This was new to us as we have always found our cellphone company reliable. The phone was showing a connection, but except for simple texts, nothing would send, and we could not use the internet. Having an online business, we can't wait to return to our hotel to connect to Wi-Fi. We also use our phones as GPS and to look up sites and restaurants. It wasn't the phone, it was the service. What made this more scary for us was when, in Paris, Uber would not load though it showed a full signal.

When it's late at night in a foreign city, the last thing you need is a phone that is not loading. It was apparent we would have to find alternative options in the future. One that provides connectivity at all times and is economical, too. That said, we are not fans of buying SIM cards for each country, changing SIM cards out, and not having our phones to use for family emergencies.

Shortly after our return, we attended our first travel blogger conference, where we learned about [GigSky's](#) new technology and tried it ourselves. We were so impressed with the quality of the service, company, and customer support we became affiliates.

Who is [GigSky](#)

[GigSky](#), a leading provider of global mobile data services, has revolutionized the way people stay connected across borders. The company was founded in 2010 by Ravi Rishy-Maharaj, a visionary with a passion for technology and a deep understanding of the challenges faced by international travelers. Recognizing the limitations and high costs of traditional roaming services, Ravi set out to create a solution that would provide seamless, affordable mobile data connectivity worldwide. Headquartered in Silicon Valley, California, GigSky emerged as a pioneering force in the realm of global mobile data services.

In its early years, GigSky focused on establishing partnerships with mobile network operators worldwide. These partnerships were crucial in building the extensive network coverage that GigSky offers today. By collaborating with leading operators in different regions, the company was able to provide reliable and high-speed mobile data services to its users.

A significant turning point for [GigSky](#) came in 2015 when it partnered with Apple to provide global data services for Apple SIM-enabled devices. This partnership significantly boosted GigSky's visibility and credibility, as Apple users could now access their services directly through their devices. The collaboration with Apple showcased the company's reliability and the quality of its services.

Innovative Mobile for Travelers

At the heart of GigSky's offerings is its eSIM technology, which allows users to access mobile data **without** the need for physical SIM cards. This approach has simplified staying connected while traveling, making it more convenient and cost-effective.

GigSky's eSIM technology enables users to download and activate a digital SIM card directly onto their compatible devices. This eliminates the need for physical SIM cards and provides instant access to mobile data services. No more removing one SIM card for another and risking misplacing them. With an eSIM, travelers can switch between different data plans and regions seamlessly, ensuring uninterrupted connectivity.

*When purchasing a data plan through our [GigSky link](#), you can get an extra 10% off if you use our discount code **WCOMPASS10**. Great connectivity for even less!*

GigSky eSIM: An excellent choice for international travelers

Traveling abroad can be thrilling, but staying connected has become a frequent hassle. [GigSky](#) will ensure you have seamless internet access no matter where you roam. Here's how they do that:

1. Global Coverage and Reliable Connections: With [GigSky](#), you can stay connected because the company has partnerships with over 500 mobile networks in more than 190 countries, ensuring that users have access to reliable mobile data services wherever they go. There is no need to juggle multiple SIM cards or deal with local carriers—one solution covers it all. GigSky's global coverage ensures that users can stay connected without worrying about roaming charges or network compatibility. Whether in a big city or remote areas, they have you covered.

2. **Ease of Use:** Setting up [GigSky](#) is so easy. Install the app, choose your data plan, and you're ready to go—no more searching for Wi-Fi or hunting down local SIM cards. The user-friendly interface ensures that even those unfamiliar with eSIM technology can easily navigate and utilize GigSky's services.

Affordable

3. **Flexible and Affordable Plans:** [GigSky](#) offers a variety of data plans to suit different needs and budgets. Whether you need a small data pack for a quick trip or a larger plan for extended stays, there's an option for everyone. The app allows users to purchase and manage their data plans, monitor data usage, and receive real-time notifications.

4. **No Contracts:** Unlike traditional carriers, [GigSky](#) doesn't lock you into long-term contracts. You pay only for the data you need when you need it. This was a huge selling point for us. If a product does not do the job you purchased for, you can move on easily.

5. **Device Compatibility:** GigSky's eSIM technology is compatible with a wide range of devices, including smartphones, tablets, and laptops. This versatility ensures that users can stay connected across multiple devices, whether they're using an iPhone, Android device, iPad, or other eSIM-compatible gadgets.

Even on cruise ships

Cruise

6. **In the air and on the water:** [GigSky](#) is the only eSIM provider offering Cruise and Inflight connectivity. They provide low-priced cruises that include connectivity on and off the ship.

7. **Cost-Effective:** Avoid the high costs of international roaming charges. GigSky's data plans are competitively priced, giving you great value for your money. You can buy a single day of service if that is all you want or an extended package for longer stays.

8. **Customer Support:** Traveling can be unpredictable, but GigSky's customer support is always ready to help 24/7. Get assistance anytime, anywhere, and in any time zone, ensuring you stay connected without hassle. They can diagnose your network and installation issues and maintain control of the eSIM at all times.

9. **Fast Internet:** Download and send pictures, stream movies, search the web, use GPS, and look up reviews. The days of slow internet when traveling are behind you. Since they have relationships with multiple networks in each country, if one goes down, they shift the users to a working network.

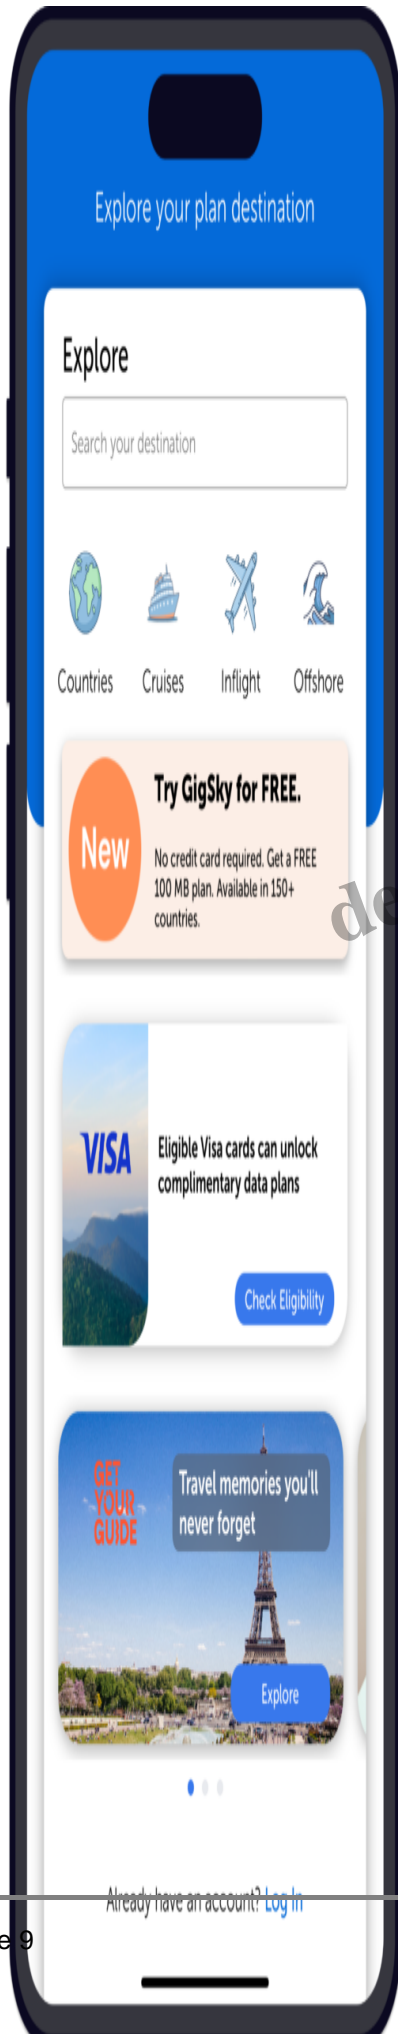

Network Provider

10. **Its own network:** GigSky is an actual network provider that has complete control of its designs.

Other eSIMs are resellers or someone else's eSIM.

11. **Leverage 2 Operators at one time:** You can leave your regular device on while the [GigSky](#) eSIM card handles data. This may sound a little confusing, but it means you can use two SIM cards at once—the phone's and the GigSky eSIM. Since our international service comes at no additional cost for our cellphone plan, this was a feature we were excited about.

GigSky has a sweet offer – You can try it for FREE!

As we were at first, you are likely to want to test this out before committing to using their product. GigSky is so confident that their product will impress you that they are giving 100 MB of data over seven days for use in any of 150+ countries. The surprising part for us is that they don't even require a credit card to do so.

It is simple to try it out. You have nothing to lose. Download the app on your device from the link below, and then click on the Free offer on the home screen. You must use this free 100 MB within 30 days of signing up for the free offer.

If you buy a plan, we have a discount code that will give you an additional 10% off (does not include cruise or inflight plans). Put in **WCOMPASS10** in the discount code field, and you are set!

[Download GigSky onto your device here](#)

Where to go on your next overseas adventures? Check out our [Country Travel Guides](#)

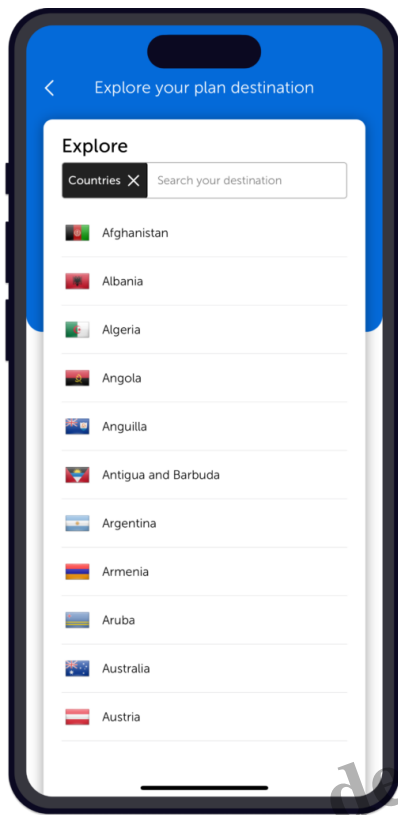

You may already have a complimentary plan.

GigSky eSIM and Visa

Some Visa cards from specific issuers have complimentary [GigSky](#) plans. Once you download the app, you can enter your credit card to see if you have a plan. You must then set that card as your default payment method to use the complimentary service.

Commitment to Customer Satisfaction

i

Being skeptical by nature, one of our biggest concerns was about customer support. Many companies are all talk but have no service; we see too much of that nowadays. Based on our research, GigSky's success can be attributed to its commitment to customer satisfaction. The company prioritizes delivering a seamless and reliable experience to its users. Its 24/7 customer support is always available to assist you, ensuring you have a smooth experience no matter where you are in the world.

The other key for us is the all-too-common surprise fees. With transparent pricing and no hidden fees, you can trust that you're getting the best value for your money. The cool part is that you won't get bill shock when you get home and look at your wireless bill. Most of us live on budgets, and we need to know what we are spending at all times.

You may have access to some of their services already.

When you purchase a data plan through our [GigSky link](#), you can get an extra 10% off if you use our discount code **WCOMPASS10. Great connectivity for even less!**

GigSky eSIMs are here to stay.

Phone connectivity in France GigSky eSim

GigSky actively seeks feedback from its users so it can improve its services. The company seems to value customer input and then uses it to enhance the overall user experience. It is a very competitive market out there; staying on top of the game is how you stay on top of the game. To remain at the forefront, the company is exploring new partnerships, technologies, and markets. With the rapid growth of eSIM use and the increasing demand for reliable global connectivity, GigSky is well-positioned to continue its success.

Final thoughts

Here is the bottom line: it works!! We wish we had known about this a long time ago, the money we could have saved!!

Staying connected while traveling has never been easier with [GigSky](#). Whether you're exploring new cities for leisure or traveling for business, GigSky's innovative eSIM technology ensures you have reliable and affordable mobile data wherever you go. Forget about the hassle of swapping physical SIM cards or dealing with excessive roaming charges. With GigSky, you can download and activate a digital SIM directly onto your compatible device, providing instant access to data services in over 190 countries. Seamless, stress-free connectivity is just a few taps away!

If you use **GigSky**, please take the time to let us know about your experience, both good and bad. Since this is new to us as well, we want our readers' feedback. Our commitment is only to recommend quality products to our readers.

Are you planning an overseas trip where you can use your new [GigSky](#) APP?

Check out accommodation prices for your next destination below.

It is important to price out accommodations on various sites. [Expedia](#) is a US-based company, whereas [Booking.com](#) is Europe-based. Not all properties appear on both, so it is ideal to check both out. Our personal first choice is [Booking.com](#). If the establishment has a website, check the price there as well. Click the link below to check out hotels and vacation homes in the area. It may be just the motivation you need to start planning that next grand adventure.
